

AKRA PACK™

All Purpose Bike Pack

A revolutionary new storage system that takes advantage of the most underutilized space on today's bike frames

AKRA PACK has a lightweight and aerodynamic design that allows easy access while riding. Constructed of durable 600 denier with urethane coating, double stitched seams, an inner liner for protection, and reinforced polymer flaps. All pockets securely close with velcro.

Inside body pocket provides plenty of room for storing additional gear and goes not interfere with riding.

Two convenient side pockets ideally fit water bottles and portable devices.

Shock cord suspension reduces road vibration to sensitive contents.

"AKRA PACK has proven itself an invaluable asset while on my bike. During a triathlon there is a fine balance between carrying too much and not having enough, and it's always dependent upon the space you have."

Rob Hansen, Multi-time Triathlete, Loveland, CO

Installs in minutes.

No interference with brake or gear cables.

Installs around existing bike accessories: water bottle, tire pump, lock, etc.

Available in two sizes. Designed to fit virtually all road and/or mountain bikes.
